Rows per page: 15

1-15 of 93

All collected points/km of everyone ever participated since the set date will be shown in the first tab KILOMETERS

All filtered lists can be exported as CSV and be printed if you click on „EXPORT“

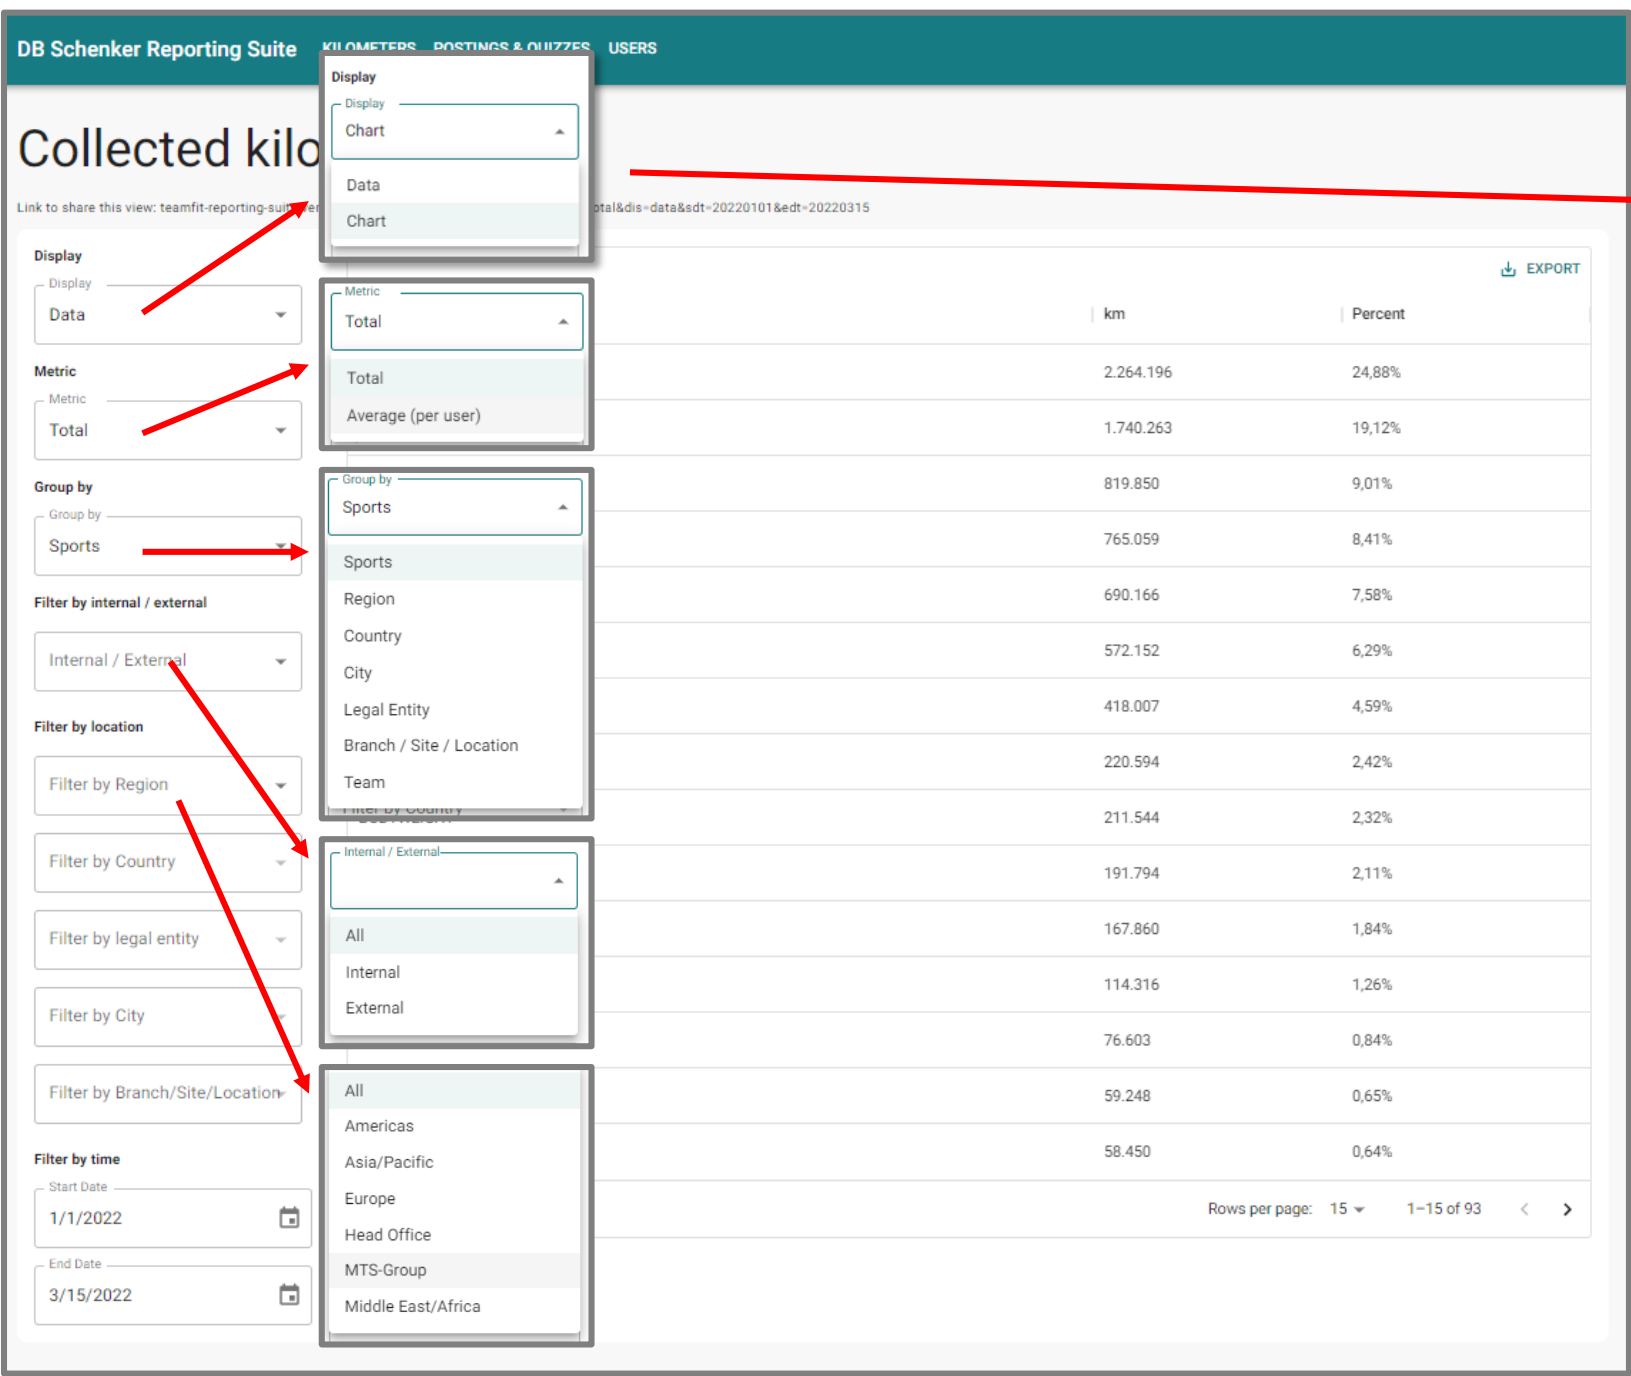

If you hover over the corner of the table the 3 dots-menue will appear where you have multiple sorting-methods available

Every single row on the table can be filtered individually

and can be additionally filtered individually by key words for example

You can filter on a specific timeframe

KILOMETERS statistics

Collected kilometers can be sorted as:

- Pure data or as a chart
- In total or as an average analysis
- within different groups like sports, region, country etc.
- If users are DB-Schenker internal or external
- + filtered by location

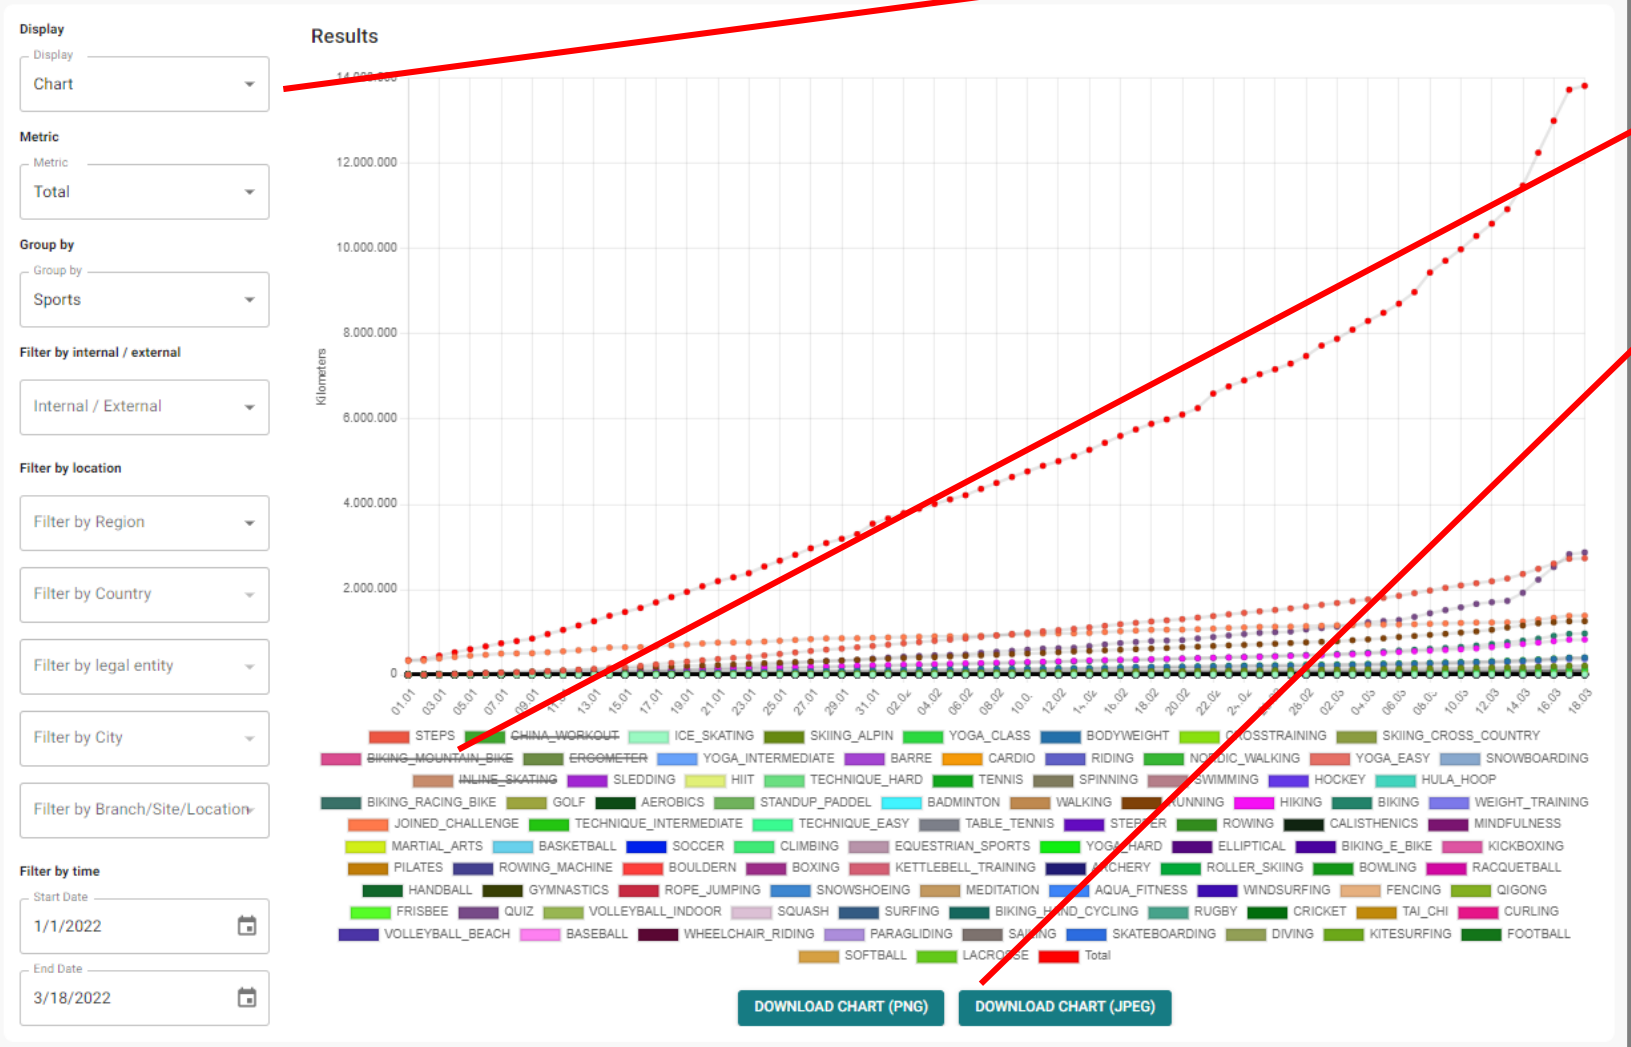

If filtered on location, the other filters below will be enabled for a more specific filtering like Region-Country-Legal Entity-City and even Branch/Site/Location

You can copy the this link and share it with your colleagues. This link will always open the exact page you are on right now with all set filters.

If filtered on “Region” within the KILOMETERS-Table You will find 4 rows within the table

- **Headcount**
All DB-Schenker employees
- **Goal / Time reached**
Percentage of the goal reached within the selected time-frame
- **Total Goal reached**
Percentage of the entire challenge-goal reached
- **Km**
Total KM reached

All posting and quiz activities can be seen in this category.

In general your filter on a specific timeframe and will show you all statistics from all participating countries.

Postings can be filtered by only Region, Country or even in Countries by Region

Every single table can be separately filtered on all filter-options available (hover with your cursor over the table-head) so you can always find out which country created the most questions of reached the most km with all quizzes for example.

- **Reached KM (average per registered User)**
Average reached KM per active users
- **Max KM (per registered User)**
Maximum KM reachable per user for all quizzes per active users
- **Reached KM**
All KM reached by all registered users with quizzes
- **Max KM (total all registered users)**
Maximum amount of KM what could have been reached by all active users
- **Percent of Max KM (registered users)**
Reached KM divided by Max KM

Rows per page: 15 1-7 of 7

Within USERS you can find all statistics regarding all users and their participation, their activities by all kinds of filters which you find again on the left side.

All users participated in the challenge divided by number of employees of DB Schenker (given by the HQ) *100 = the participation-rate in %
(Note: there might be even more than 100% if external participants are within the countries teams)

- **Registrations**
All users which did register for the challenge
- **Active Users**
All users which ever did at least one workout or a quiz
- **Active Workout Users**
All users which did at least one workout
- **Active Quiz Users**
All users which did at least one quiz
- **Inactive Users**
All users which never did no workout or quiz after the registration
- **Incomplete Registrations**
All users which did not register completely
- **Lost Users**
All users which left the challenge/app
